

CIVIC EDUCATION KENYA

THE PRICE OF COMPROMISE

because corruption is
perfected by our leaders
but starts with you

THE PRICE OF COMPROMISE

11 BILLION

Let's use examples...

The thickness of a crisp KSh 1000 bank note is about 0.1mm

About as thick as this underline ↗

If stacked on top of each other face down/up, the stack would be taller than Burj Khalifa & KICC combined

...or even Burj Khalifa and Britam Towers combined

That's **200,000** secondary school kid's **1 year** upkeep

Or even better, **ALL** primary school children in Kenya get **FREE EDUCATION** for **1 year** with that money

It's even enough to sustain **Kwale County FULLY** for **1 year**

...KSh 11 Billion

+ Britam
Towers
+ KICC

...Burj Khalifa vs...

Nairobi Skyline vs...

THE PRICE OF COMPROMISE

Well, what about...

300 BILLION

...KSh 300 Billion

If 11 Billion automatically forms the *tallest man-made structure on Earth*, what can 300 Billion do?

Using **KQ Airlines** on international airspace, you'd be lucky to even get to **see** the mid section of that stack. But how much are we talking about?

Get this:

Free Primary School Education for... 23 YEARS!

...commercial flights

height vs...

Pay **EVERY** public school teacher - and still have change

...height of Mt Kenya

Use *the change* to pay **3000 MBChB interns unpaid by Health Ministry & still have change for 72,000 more**

vs...

Take care of **28 counties' budgets for 1 year**

A silhouette of Mount Kenya's peak.

Buy the entire **Northlands Ranch 11,576 acres property off the Kenyatta Family at KSh 25 million per acre**

Burj Khalifa vs...

Buy **ALL** of the Kenyatta University land **2x over**

THE PRICE OF COMPROMISE

If it hasn't yet stuck to you...

THIS WILL

We've seen 11 billion... we've seen 300 billion...

Imagine Kenya saving **2.38 trillion**. Remember that figure.

If Kenya had avoided Uhuruto - i.e. the SGR, the Nairobi Expressway, ghost projects & the large borrowing spree & instead sustained an average 6.75% growth rate 2013 to 2026 (all factors considered), Kenya's economy in 2026 would roughly be about **KSh 2.38 trillion** larger - not 12 trillion in debt!

That's the cost of **1 right vote**... in 2013.

 Are some leaders prepared to steal the votes? **YES**

 Will media and communications be compromised? **YES**

 Are appointments being made to IEBC, Judiciary & Police heads to conveniently have a takeover come 2027? **YES**

 Are security institutions a danger to the public? **YES**

 Are people in power, leaders openly stealing & no longer hiding because no one is being caught? **YES**

But is all that worth even **1 vote**... in 2027? **NO.**

THE PRICE OF COMPROMISE

If it starts with you, it also...

ENDS YOU

Yet, we are here. **KSh 12 trillion in debt**. The Uhuruto curse digging its claws ever deeper into the flesh of an already fat-head frail-body cow.

This choice is **OURS** - we embraced it. Accepted its smiles, speeches and matching ties. Danced to its eloquence, appeased by its feigned gentleness. As we said “**We didn’t have a better choice**”. Right?

Now, we don’t have a choice - even though we know who **CAN’T** come back

But they **WILL** - unless...

Unless we see that Rasna Wallah’s prediction is becoming reality:

*“I said it before, am saying it again, one day someone will look at Kenya and say,
here lie the ruins of a country destroyed by greed”*

...and the **254** can easily become another Uganda or Sudan,
if we do not do something about it.

“What?” - you ask?

THE PRICE OF COMPROMISE

This is...

TRUE POWER

PREAMBLE

We, the people of Kenya—ACKNOWLEDGING the supremacy of the Almighty God of all creation:...

God is Sovereign

The leaders have granted authority
But the people **ALWAYS** bear the power

Your vote is expensive.
Your voice is powerful.

They will try and silence you, overwhelm you, fatigue you & keep you feeling worthless

It is **very important** that you ignore **ALL** such attempts!

...instead, here's ways to actively **undo** their compromises

THE PRICE OF COMPROMISE

This is...

HOW

 Pray (we're not even joking)

 Stay *continually* informed - educate yourself civically! Remember!

 Register as a voter. (Use our **NASAKA** tool to see centers near you)

 Refuse to be a part of injustice happening - **SPEAK UP !**

 Get the message home - your folks are a **weakness point!**

 Join, contribute to and create content with **civic spaces!**

 Don't be afraid to use your tools - socials, stories - to advocate!

+2.38 trillion, or another **-12 trillion**

If our taste must be expensive, we can get the Singapore without going through Somalia

Ifikie Githinji, but ipitie kwetu kwanza
